

# Democratisation: Why Now?

- **Reliance on solutions designed without authentic consideration of context.**
- **Lack of an enabling environment in local published and unpublished evidence can be utilized**
- **Current evidence infrastructure does not relate to or appeal to wide range of users**
- **Marginalization still a serious challenge: evidence infrastructure is not favor equity focused solutions**
- **Need for Concerted and demonstrable shift to value and promote evidence traditions that are borne out of the reality of local contexts**
- **Education is being re-imagined to overcome challenges that include a chasm between knowledge and decision making/practice, evidence must of necessity be reimaged as well**

# WORKING WITH EDUCATION.ORG

**DO YOU HAVE EXPERTISE OR KNOWLEDGE OF  
WORKING WITH EVIDENCE SYNTHESIS,  
POLICY ANALYSIS AND FORMATION, OR  
INFORMATION SCIENCE AND AI?**

**If so, we would like to hear from you. We are looking to recruit volunteers, advisors, consultants and staff members who can support us in our work and expand our reach to more countries and education systems. Join us in our vision of improving the education and learning outcomes of millions of children.**

**Please contact us at: [info@education.org](mailto:info@education.org) for further details.**
