

Implementation of a research, evidence uptake and learning strategy

Implementation of a research evidence uptake and learning strategy

- **Context-international NGO in more than 30 countries, including Africa**
- **Stakeholders- government, development partners, communities**
- **Learning and innovation essential to quality of what we do**
- **We generate evidence through research and programs**
- **To enhance uptake, we developed systems to capture, communicate and use evidence across our internal and external stakeholders**

Case studies

- **The INVEST Study- featured in #Livingthemanifesto**
 - Generating evidence on use of evidence in policymaking
 - Participatory research implementation processes-capacity building of stakeholders during implementation
 - Use of findings to improve practices in other similar settings

- **Safely at school study in Sierra Leone**
 - Investigation of sexual and gender-based violence among students with disabilities
 - Inclusive implementation with young researchers with disabilities, ministry of education
 - Use of research implementation experience and the findings to inform policy and change practice
